EXPERIENCE

Software Developer

Sep 2024 - Present

ArchimedesRx

- Developing and maintaining in-house automation software to handle ETL processing, reporting, and analytics utilizing Python and existing C# applications to support pharmacy benefits management.
- Designed, built, and maintaining a full-stack Next.js application to centralize and streamline configuration of complex backend systems. Deployed end-to-end via Azure including environment setup, CI/CD through Azure DevOps, application hosting, and role based authentication via Entra. Enabled cross-team access to tasks previously restricted to IT, reducing ticket volume and improving turnaround time by reducing manual entry errors.
- Handling day-to-day engineering support across database management, SFTP file automation, and internal tooling resolving complex technical issues for multiple departments.
- Coordinating escalations and information hand-offs with the offshore development team.

Software QA Engineer & Software Developer

May 2022 - Sep 2024

EnableComp

- Stood up frontend automation testing suite using Playwright framework for existing in-house software to support processing of complex healthcare claims.
- Integrated tests into CI/CD pipeline through GitHub Actions Runner.
- Designed and developed automated regression tests using TypeScript.
- Developed software for multiple applications utilizing React, AngularJS, .NET, SQL Server.
- Participated in agile scrum sprints using Jira and GitHub.

Guidewire Developer & Core Application Developer

Feb 2020 - May 2022

Farm Bureau TN

- Developed software using Java-based Gosu for Guidewire.
- Developed software for applications utilizing a Java EE, Maven, Spring Framework based tech stack.
- Resolved tickets through various means including MySQL database and API call management.
- Prevented future tickets by improving quality of code and user validation.

SKILLS

Languages: JavaScript/TypeScript, SQL, Python, C#

Front-end: React, Next.js, SvelteKit, Tailwind CSS, Playwright

Back-end: Node.js, REST APIs, Prisma ORM, PostgreSQL

Cloud/DevOps: Azure, Azure DevOps, GitHub, GitHub Actions, Vercel

AI/Developer Tools: GitHub Copilot, Claude, Spec-driven agentic AI development

EDUCATION

AAS in Computer Information Technology, Programming Concentration

Graduated at Columbia State Community College
